DETAILED ACTION

Receipt is acknowledged of the Amendment filed 12-6-2004.

Allowable Subject Matter

Claims 1-8 and 20-28 are allowable over the prior art of record.

The following is an examiner's statement of reasons for allowance: Although Bergman et al. (US PAT No. 6,605,958) teaches precision on-chip transmission line termination, one of ordinary skill in the art would not have been motivated to modify the teaching of Bergman et al. to further includes, among other things, the specific of a differential impedance termination circuit comprising third and fourth transistors coupled in parallel where drains of the third and fourth transistors are coupled to a second terminal of the first resistor and sources of the third and fourth transistors are coupled to a second terminal of the second resistor and a third resistor having a first terminal coupled to the second terminal of the first resistor and a fourth resistor having a first terminal coupled to the second terminal of the second resistor with respect to claims 1 and 28, and a second transistor having a source coupled to the first terminal of the first resistor and a drain coupled to a second terminal of the first resistor and a first terminal of the second resistor, third and fourth resistors coupled together in series, the third resistor having a first terminal coupled to a source of the first transistor, and a third transistor having a drain coupled to the first terminal of the third resistor and a source coupled to a second terminal of the third resistor and a first terminal of the fourth resistor with respect to claim 20.
